Sir:

1. I, the undersigned, am an attorney with Jones Day. Since March 25, 2008, I have prosecuted the above-identified U.S. Application No. 10/787,385 (the “’385 application”), which issued as U.S. Patent No. 7,229,636 B1 on June 12, 2007.

2. The ’385 application was filed on February 26, 2004 by Paul G. Lunn of Nastech Pharmaceutical Company Inc. A Nonpublication Request Under 35 U.S.C. § 122(b)(2)(B)(i) was made at the time the ’385 application was filed.

3. On June 23, 2006, PCT International Application No. PCT/US2006/024685 (the “’685 international application”) was filed by Jeffrey J. King of Black, Lowe & Graham PLLC. The ’685 international application was published on December 27, 2007 under International Publication No. WO 2007/149098 A1.

4. On March 25, 2008, the undersigned submitted papers to the U.S. Patent Office revoking the prior Powers of Attorney and appointing the undersigned and other attorneys at Jones Day to prosecute the ’385 application.

5. The ’685 international application does not claim priority to the ’385 application and has a different disclosure than that of the ’385 application. In other words, the ’685 international application is not a foreign counterpart of the ’385 application. Although there is some overlapping subject matter, there is no question that claims secured

as part of the '385 application will not be pursued as part of the foreign filing of the '685 international application. As with the differing disclosures of the '385 and '685 applications, the intent of the '385 and '685 applicant was and is to claim distinct inventions.

6. Thus, any delay in providing notice to the U.S. Patent Office of the filing of the '685 international application at that time and until the date of this petition was unintentional. Indeed, applicants do not believe such notice was required, but to the extent the U.S. Patent Office believes it was, the delay was unintentional.

7. The defendant in litigation pending before the United States District Court for the Southern District of California, known as *QOL Medical, LLC v. Fleming & Company, Pharmaceuticals*, Case No. 09 CV 0001 LAB JMA, has asserted that a continuation-in-part of the instant case, U.S. Application No. 10/814,399 (the "'399 application"), which issued as U.S. Patent No. 7,404,489 B1 on July 29, 2008, went abandoned in light of the filing of the '685 international application.

8. In an abundance of caution, Applicants petition the U.S. Patent Office to revive the above-identified application under 37 C.F.R. § 1.137(f). The petition should be granted as all the requirements, including the required statement and authorization for the required fee, are set forth herein.

9. Applicants submit concurrently herewith a Notice of Foreign Filing Under 35 U.S.C. § 122(b)(2)(B)(iii) and 37 C.F.R. § 1.213(c) and Rescission of Previous Nonpublication Request to meet the reply requirement of 37 C.F.R. § 1.137(c).

10. In sum, if the U.S. Patent Office determines that the '385 application should have been abandoned for failure to notify the U.S. Patent Office of an international filing pursuant to 37 C.F.R. § 1.137(f), then it is respectfully requested that the '385 application be revived as an unintentionally abandoned application pursuant to 37 C.F.R. § 1.137(b).

11. Authorization is hereby given to charge the fee of \$810.00 pursuant to 37 C.F.R. § 1.17(m) to Deposit Account No. 50-3013. Should any additional fee be required, please charge the required fee to Jones Day Deposit Account No. 50-3013.

As set forth above, the petition should be granted. If additional information is needed, the U.S. Patent Office is respectfully requested to contact the undersigned.

Respectfully submitted,

Anthony M. Insogna, Reg. No. 35,203
